4D LABS

STUDENT INVENTION COMPETITION

Ever wake up in the middle of the night with a great idea?

Do you hear yourself saying, “If only we had...” or “Wouldn’t it be better if...”?

Have you been sitting on an idea, just waiting for the ‘right time’?

Join Our 2020 Student Invention Program

If you are a student or a group of students enrolled at a Canadian post-secondary institution with an innovative Materials Science & Engineering idea and are looking for a place to develop it, we want to know about you. 4D LABS, Simon Fraser University’s \$70M Core Facility for Materials Science & Engineering announces its fifth Student Invention Program. Come to 4D LABS and see your ideas come to light. And let us cover the costs.

Contact us for more information at projcompetition@4dlabs.ca

Where **new materials**
take shape.
