

CLEARink is hiring a team that will develop a new generation of displays. This team will become the future leaders of the company. We are seeking candidates in the fields of electrical engineering, materials, optics, and chemistry,

Candidates must be bright, creative, hard-working, energetic, systematic, diligent team players, and with a good command of English. It is very important that candidates are solution rather than process oriented, and motivated by the challenge of working on a revolutionary new technology. CLEARink is looking for overachievers willing to work flexible hours to meet schedule demands, and willing to live in, or relocate to California, USA; or Vancouver, Canada.

All technical positions require a degree from a recognized university, with a PhD being an asset for all roles, and especially for the scientist roles. Due to the international nature of the company, overseas experience is considered a plus. Compensation will be competitive for a start-up in this space.

Interested candidates are encouraged to apply to hr@clearinkdisplays.com
